BIOGRAPHY

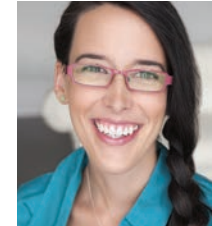

Dr. Jean-Sébastien Boileau

DVM, Dipl. ACVIM (Cardiology)
Veterinary Cardiologist
Medical Director

Dr. Boileau graduated from the Faculté de Médecine Vétérinaire, Université de Montréal before embarking on a journey that would lead to an internship at Michigan Veterinary Specialists followed by residency training at the prestigious Animal Medical Center in New York. In 2006, Dr. Boileau becomes one of the few board certified veterinary cardiologists from the American College of Veterinary Medicine. He worked as a clinician, consultant and chief medical director in leading veterinary medical centres in the US before returning to his roots in Quebec.

Animal welfare is at the heart of Dr. Boileau's mission; this led him to develop unique mobile services to make veterinary cardiology more accessible. In addition to his mobile services, Dr. Boileau regularly practices cardiology medicine and performs interventional procedures at referral centres in the greater metropolitan area.

Dr. Catherine Bélanger

DVM, Dipl. ACVIM (Cardiology)
Veterinary Cardiologist

Dr. Catherine Bélanger hails from Boucherville. Passionate about animals since childhood, she studied in the Montreal and in the Toronto area before graduating from the Faculté de Médecine Vétérinaire, Université de Montréal in 2012. She then extended her stay at the veterinary school for another year to complete an internship in small animal medicine and surgery. Following her internship, wishing to increase her knowledge in cardiology and research, she joined Dr. Pibarot's team at the Institute of Cardiology and Pneumology at Laval University. She worked with a team conducting research on mitral valve disease in asymptomatic patients.

In 2014, she moved to California and began a 3-year cardiology residency at the University of California, Davis. Over the course of her studies, she continued to expand her knowledge and developed an interest in mitral valve and congenital diseases.

In June 2017, Dr. Belanger graduated from UC Davis and became a board certified veterinary cardiologist from the American College of Veterinary Medicine. She then joined the team at Les Services E-vet Mobile. Dr. Belanger is a passionate cardiologist who enjoys practicing cardiology medicine and working with veterinarians to provide the best care possible to her patients. She has also received training in interventional procedures which she performs with Dr. Boileau in referral centres in the greater metropolitan area.

Why should my pet see a veterinary cardiologist?

In addition to having specialized training and expertise, veterinary cardiologists have access to state-of-the-art equipments for both diagnostic and therapeutic purposes.

Should your animal show signs of heart disease, a consultation with a veterinary cardiologist is the most effective way to obtain a quick and accurate diagnosis and to determine the best therapeutic management strategy.

Also, if your pet requires anesthesia, the cardiologist can determine what risks are involved and make recommendations on an anesthetic protocol based on your pet's heart condition.

What are the benefits of a mobile cardiology service?

- Easy access to the only two board certified cardiologists in Québec.
- Reduced stress and anxiety for your pet; everything is done at your regular vet's office, near your home.
- No intermediary between your veterinarian and the cardiologist.
- Affordable and timely appointment.
- Fast service and results.

What happens during a consultation with our mobile cardiology service?

1. Day of the appointment

The day of the appointment with the cardiologist, you will have to leave your pet for a few hours in the caring hands of your veterinarian.

2. The consultation

The cardiologist accompanied by a veterinary technician will visit your clinic, review your pet's medical records, perform a physical examination and any diagnostic procedures recommended by your veterinarian.

3. After the consultation

The cardiologist will communicate verbally the results of the cardiac workup to your veterinarian, then send a comprehensive report detailing your pet's heart condition. Take notice that you will not meet directly with the cardiologist. Your trusted veterinarian will share the results and the recommendations directly to you.
